

Project Pipeline Supply Ltd

Quality Policy

The Policy of Project Pipeline Supply Ltd is to guarantee supply of its manufactured products;

- i) To a high and consistent quality to meet the expectations and needs of all customers and interested parties
- ii) To enhance customer satisfaction through the effective application of the system
Including measurable processes for continual improvement of the system and the assurance of conformity of product to customer requirements.
- iii) To comply with both statutory and regulatory requirements

The management system has been introduced in order to ensure that all products are manufactured and supplied to the standard required and complies with the requirements of BS EN ISO 9001:2015

The Company have appointed a management representative who is responsible for and is authorised by top management to ensure that the processes and procedures are implemented, communicated, applied and maintained at all levels.

The management representative is also responsible for monitoring and periodic systematic reviewing of the management system and is authorised to make any necessary additions or changes that may be required.

It is the responsibility of top management to review this policy for continuing suitability

In implementing our Quality Systems and Objectives it is the aim of Project Pipeline Supply Ltd to ensure that not only products of the highest quality are produced but they are delivered safely, on time and defect free.

Any process of system deficiency detected is dealt with promptly taking appropriate corrective action and or preventative action required to minimise/eliminate re-occurrence.

Project Pipeline Supply Ltd's Quality Department operate totally independently from all other company operations. The Quality Manager reports directly to the Managing Director.
